RELAZIONE PROGETTO BASI DI DATI

Martina Daghia – 0000915665   **Martina Zauli** - 0000915901   **Stefano Deri** – 0000921789

ANALISI DEI REQUISITI

SPECIFICA DEI DATI

La piattaforma **CONFVIRTUAL** deve gestire i dati delle conferenze a tema informatica/tecnologie digitali. Ogni conferenza dispone di un nome (es. "International Conference on Database Systems"), un acronimo (es. "DB"), un anno di edizione, delle date di svolgimento (uno o più giorni), un'immagine per il logo, uno campo svolgimento (campo enum con due possibili valori: "Attiva" o "Completata"), un campo #totale_sponsorizzazioni. Anno di edizione ed acronimo (es. "DB 2021") sono univoci nella piattafborma. La conferenza può disporre di uno o più sponsor; ogni sponsor dispone di un nome, un'immagine per il logo, ed eroga un importo per la sponsorizzazione di ogni convegno in cui appare. Lo stesso sponsor può apparire in più conferenza. Per ogni giorno di svolgimento della conferenza, si vuole tenere traccia del programma giornaliero. Quest'ultimo è strutturato in una o più sessioni. Ogni sessione ha un codice (univoco, a livello globale), un titolo (stringa di 100 caratteri), un campo #numero_presentazioni, un'ora di inizio un'ora di fine, ed un link alla stanza Teams per lo svolgimento; ogni sessione è allocata ad un solo programma giornaliero. Invece, è consentito avere sessioni in parallelo (stessa data ed orario inizio/fine sovrapposte). La sessione è composta da una o più presentazioni: ogni presentazione dispone di un codice (univoco), un'ora di inizio, un'ora di fine ed un numero di sequenza all'interno della sessione; non è possibile avere presentazioni che eccedano l'orario di inizio o di fine della propria sessione. Le presentazioni possono appartenere a due tipologie, in maniera esclusiva: presentazioni di articoli o tutorial. Nel primo caso, si vuole tenere traccia del titolo dell'articolo, del numero di pagine e del file PDF, della lista degli autori, e della lista di parole-chiave; ogni parola chiave è una stringa di massimo 20 caratteri, ogni autore dispone di nome e cognome. Inoltre, ogni presentazione di articoli dispone di campo stato_svolgimento (campo enum con due possibili valori: "Coperto" o "Non coperto"). Nel caso di tutorial, si vuole tenere traccia del titolo dell'intervento e dell'abstract (campo testuale di 500 caratteri). La piattaforma consente iscrizioni volontarie da parte degli utenti; ogni utente dispone di username, password, nome, cognome, data e luogo di nascita. Sono previste tre tipologie di utenti: presenter, speaker ed amministratore. Esistono tuttavia utenti generici che non appartengono ad alcuna delle tre categoria sovra menzionate. Ogni utente può registrarsi alle conferenze presenti nella piattaforma; lo stesso utente può essere registrato ad un numero arbitrario di conferenze, una conferenza può disporre di un numero arbitrario di utenti registrati. Sia i presenter sia gli speaker dispongono di un curriculum vitae (campo testo di 30 caratteri), una foto e un'affiliazione universitaria, con nome dell'università e nome del dipartimento. I presenter possono svolgere SOLO presentazioni di articoli; ogni presentazione di articolo è associata ad uno ed un solo presenter. Un presenter può presentare più articoli. Un presenter deve essere necessariamente uno degli autori dell'articolo. Gli speaker possono svolgere SOLO presentazioni di tutorial; ogni presentazione di tutorial è associata ad ALMENO uno speaker. Uno speaker può presentare più tutorial. Inoltre è prevista la possibilità per uno speaker (e SOLO a loro) di caricare sulla piattaforma delle risorse aggiuntive per consentire la fruizione del proprio tutorial: una risorsa aggiuntiva consiste in un link Web (es. link a video Youtube), in una breve descrizione di testo e fa riferimento ad un solo tutorial. Un tutorial potrebbe non avere risorse aggiuntive. Gli amministratori (e solo loro) possono creare le conferenze presenti nella piattaforma; ogni conferenza è associata ad ALMENO un amministratore. Un amministratore può creare più conferenze. All'atto della creazione di una nuova conferenza, l'amministratore è anche automaticamente registrato alla stessa (vedi sopra). Gli utenti amministratori (e solo loro) possono inserire una valutazione sulle presentazioni: ogni valutazione dispone di voto (intero tra 0 e 10) e note (stringa con massimo 50 caratteri). Ogni sessione del convegno dispone di una chat, con

possibilità di invio di messaggi da parte degli utenti (di qualsiasi categoria); ogni messaggio dispone di una data di inserimento ed un testo. Uno stesso utente può inserire più di un messaggio nella stessa chat. La chat consente l'inserimento di messaggi solo nell'orario di inizio della sessione, e si disattiva immediatamente dopo l'orario di fine della stessa. Infine, ogni utente (di qualsiasi categoria) dispone di una propria lista di "presentazioni favorite", ossia un reminder delle presentazioni del convegno che si intende seguire; la lista può includere zero, uno o più elementi.

LISTA DELLE OPERAZIONI

Operazioni che riguardano tutti gli utenti:
- Autenticazione alla piattaforma
- Registrazione alla piattaforma
- Visualizzazione delle conferenze disponibili
- Registrazione ad una conferenza
- Visualizzazione delle sessioni e delle presentazioni in ogni sessione
- Visualizzazione/inserimento messaggi nella chat di sessione
- Inserimento/visualizzazione lista presentazioni favorite

Operazioni che riguardano SOLO gli utenti AMMINISTRATORE:
- Creazione di una nuova conferenza
- Creazione di una nuova sessione della conferenza
- Inserimento delle presentazioni in una sessione
- Associazione di uno speaker alla presentazione di un tutorial
- Associazione di un presenter alla presentazione di un articolo
- Inserimento/visualizzazione delle valutazioni sulle presentazioni
- Inserimento di uno sponsor/sponsorizzazione

Operazioni che riguardano SOLO gli utenti PRESENTER:
- Inserimento/modifica del CV/foto ed affiliazione universitaria

Operazioni che riguardano SOLO gli utenti SPEAKER:
- Inserimento/modifica del CV/foto ed affiliazione universitaria
- Inserimento/modifica delle risorse aggiuntive per il proprio tutorial

Statistiche (visibili da tutti gli utenti nella pagina iniziale):
- Visualizzare il numero (totale) di conferenze registrate
- Visualizzare il numero (totale) di conferenze attive
- Visualizzare il numero (totale) di utenti registrati
- Visualizzare la classifica dei presenter/speaker sulla base del voto medio
- Sponsorizzazioni e relativo numero di sponsorizzazioni effettuate
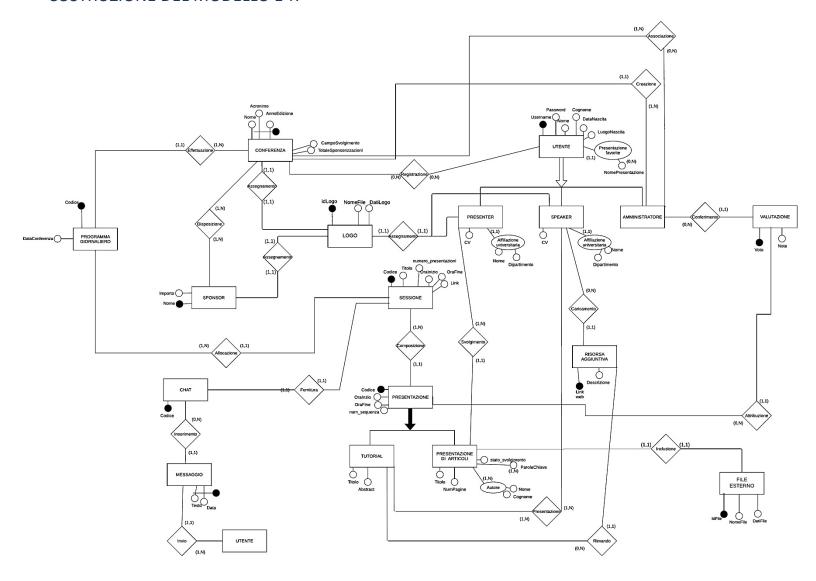

GLOSSARIO DEI DATI

TERMINE	DESCRIZIONE	SINONIMI	COLLEGAMENTI
Conferenza	Presentazioni online su Teams, possono essere presentazioni di articoli o tutorial	Convegno	Programma Giornaliero, Amministratore, Sponsor, Logo, Utente
Sponsor	Sostenitore di una o più conferenze		Conferenza, Logo
Programma giornaliero	Tiene traccia del programma di ogni conferenza da svolgere in un determinato giorno.		Conferenza, Sessione
Sessione	Diversi turni nel quale si tengono le presentazioni		Programma Giornaliero, Chat, Presentazione
Presentazione	Attività svolta durante le sessioni		Sessione, Presentazione di Articoli, Tutorial, Valutazione
Presentazione di articoli	Tipo specifico di presentazione riguardante gli articoli.		Presenter, Presentazione, File esterni
Presentazione di tutorial (Tutorial)	Tipo specifico di presentazione riguardante i tutorial		Presentazione, Speaker, Risorsa aggiuntiva
Utente	Persona che può registrarsi nella piattaforma e partecipare alle conferenze	Utente generico, Utente registrato	Presenter, Speaker, Amministratore, Conferenza, Messaggio
Presenter	Tipologia di utente che può presentare un articolo		Utente, Presentazione di Articoli, Logo
Speaker	Tipologia di utente che può dimostrare un tutorial		Utente, Tutorial, Risorsa aggiuntiva, Logo

Amministratore	Tipologia di utente che amministra conferenze nella piattaforma	Utente amministratore	Utente, Conferenza, Valutazione
Risorsa aggiuntiva	Descrizione opzionale dei tutorial		Tutorial, Speaker
Valutazione	Espressione di voto relativa ad una presentazione		Amministratore, Presentazione
Messaggio	Descrizione testuale che un utente può inviare all'interno di una relativa chat		Utente, Chat
Chat	Luogo virtuale dedicato allo scambio di messaggi tra utenti diversi		Messaggio, Sessione
Logo	Immagine relativa ai loghi degli sponsor oppure alle immagini dei vari utenti	Foto	Conferenza, Sponsor, Presenter, Speaker
File esterni	File relativi alle presentazioni di articoli		Presentazione di articoli

Conferimento	Conferimento di una valutazione da parte di un amministratore)	Uno-a-molti	Amministratore, Valutazione
Attribuzione	Attribuzione di una valutazione su una presentazione	Uno-a-molti	Valutazione, Presentazione
Inclusione	Inclusione di file esterni alle presentazioni di articoli	Uno-a-uno	File Esterno, Presentazione di Articoli
Assegnamento	Assegnamento di un logo o una foto	Uno-a-uno	Logo, Presenter
			Logo, Speaker
			Logo, Conferenza
			Logo, Sponsor
Associazione	Associazione di una conferenza ad uno o più amministratore	Molti-a-molti	Amministratore, Conferenza
Effettuazione	Una conferenza si effettua in più programmi giornalieri	Uno-a-molti	Conferenza, Programma Giornaliero

BUSINESS RULES

Dopo aver analizzato il testo abbiamo trovato diverse business rules e abbiamo notato che sono presenti regole di vincolo e regole di derivazione.

REGOLE DI VINCOLO:

1. Ogni sessione ha un titolo che è una stringa di 100 caratteri.
2. Ogni parola chiave è una stringa di massimo 20 caratteri.
3. Curriculum vitae di speaker e presenter (campo testo di 30 caratteri)
4. Abstract di tutorial può essere di massimo 500 caratteri.
5. Ogni valutazione dispone di voto rappresentato da un intero compreso tra 0 e 10.
6. Ogni valutazione dispone di note rappresentate da una stringa di massimo 50 caratteri.
7. Non è possibile avere presentazioni che eccedano l'orario di inizio o di fine della propria sessione.
8. Un presenter deve essere necessariamente uno degli autori dell'articolo.
9. All'atto della creazione di una nuova conferenza, l'amministratore è anche automaticamente registrato alla stessa (vedi sopra)
10. La chat consente l'inserimento di messaggi solo nell'orario di inizio della sessione, e si disattiva immediatamente dopo l'orario di fine della stessa.

REGOLE DI DERIVAZIONE:

1. In "conferenza" c'è un campo *svolgimento* (campo enum con due possibili valori: "Attiva" o "Completata")
2. Ogni presentazione di articoli dispone di campo *stato_svolgimento* (campo enum con due possibili valori: "Coperto" o "Non coperto").
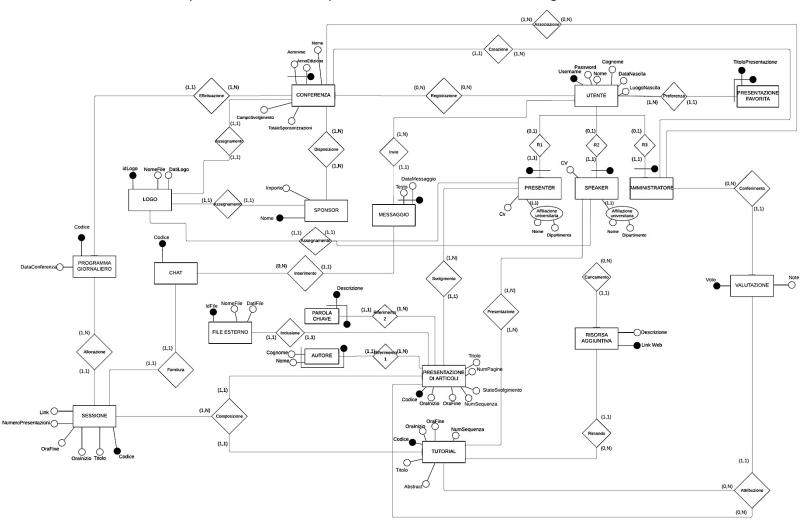

PROGETTAZIONE LOGICA

SCHEMA E-R RISTRUTTURATO

Per procedere con la traduzione dello schema E-R nello schema logico, abbiamo dovuto eliminare le generalizzazioni. Per eliminare le generalizzazioni generalmente ci sono tre tipi soluzioni. Nel caso della generalizzazione presentazione abbiamo usato la soluzione che prevede l'accorpamento delle entità genitore nelle entità figlie con i relativi attributi e relazioni. Invece, per la generalizzazione utente abbiamo adottato un'ulteriore soluzione, ovvero abbiamo sostituito la generalizzazione con relazioni tra l'entità genitore e l'entità figlie. Inoltre, abbiamo dovuto eliminare gli attributi multi-valore ("Autore", "Nome Presentazione" e "Parola Chiave") introducendo una relazione uno-a-molti.
Per quanto riguarda la traduzione nelle tabelle "Presenter", "Speaker", "Sponsor", "Conferenza" e "Presentazione di Articoli" e i relativi attributi "Foto", "Logo" e "FilePresentazione", abbiamo utilizzato per la traduzione uno-a-uno il caso che prevede l'inglobamento della relazione in una delle due entità, ovvero nelle entità "Presenter", "Speaker", "Sponsor", "Conferenza" e "Presentazione di Articoli".

Invece, per quanto riguarda la traduzione delle relazioni molti-a-molti, abbiamo creato una nuova tabella con lo stesso nome della relazione, la quale contiene le chiavi primarie delle due entità a cui si collega.

ANALISI DEI COSTI

Dati:

Peso dell'operazione batch $W_B = 0.5$
Peso dell'operazione iterative $W_I = 1$
Peso operazioni di scrittura $\alpha = 2$
Formula generale: $c(O_T) = f(O_T) * w_T * (\alpha * NC_{write} + NC_{read})$

Tavola media dei volumi:

CONCETTO	TIPO	VOLUME
Conferenza	E	10
Sponsor	E	5
Disposizione	R	5

Tavola delle operazioni:

OPERAZIONE	TIPO	FREQUENZA
Operazione 1 *Inserire una nuova sponsorizzazione per una data conferenza*	Iterativa	2 volte/mese

	Batch	1 volte/mese
Operazione 2 Rimuovere una conferenza e tutte le proprie sponsorizzazioni		
Operazione 3 Calcolare e visualizzare il totale delle sponsorizzazioni di una data conferenza	Iterativa	4 volte/mese

Le prime due operazioni sono operazioni di scrittura (INSERT e DELETE), l'ultima è un'operazione di lettura in quanto consiste nel fare un calcolo (SELECT count).

Calcoli senza ridondanza:

Operazione 1 $\rightarrow$ C1 = 2 * 1 * [2 * 1 + 1] = 2 * [2 + 1] = 6
1 accesso in lettura ad una conferenza, 1 accesso in scrittura per la relazione "disposizione" (abbiamo dato per già esistente nella tabella sponsor lo sponsor che stiamo inserendo).

Operazione 2 $\rightarrow$ C2 = 1 * 0.5 * [2 * (5 + 1) + 1] = 0.5 * [12 + 1] = 6.5
1 accesso in lettura ad una conferenza, 2 accessi in scrittura: 5 accessi per le 5 cancellazioni della relazione "disposizione". E uno per l'eliminazione della conferenza (eliminiamo la sponsorizzazione e non anche gli sponsor nella tabella sponsor).

Operazione 3 $\rightarrow$ C3 = 4 * 1 * [(2 * 0) + 1 + 5) = 4 * [0 + 6] = 24
1 accesso in lettura ad una conferenza e 5 accessi in lettura per calcolare (select count()) e visualizzare il totale delle sponsorizzazioni tramite la relazione di "disposizione".

c(S) = 6 + 6.5 + 24 = 36.5

Calcoli con ridondanza:

Operazione 1 $\rightarrow$ C1 = 2 * 1 * [2 * (1 + 1) + 1] = 10
1 accesso in lettura ad una conferenza, 2 accessi in scrittura: uno per la relazione "disposizione" e uno per aggiornare la ridondanza #totale_sponsorizzazione (abbiamo dato per già esistente nella tabella sponsor lo sponsor che stiamo inserendo).

Operazione 2 $\rightarrow$ C2 = 1 * 0.5 * [2 * (5 + 1) + 1] = 0.5 * [12 + 1] = 6.5
1 accesso in lettura ad una conferenza, 5 accessi in scrittura per le 5 cancellazioni della relazione "disposizione" e 1 per l'eliminazione della conferenza (non è necessario aggiornare la ridondanza #totale_sponsorizzazione visto che stiamo eliminando la conferenza). (eliminiamo la sponsorizzazione e non anche gli sponsor nella tabella sponsor).

Operazione 3 $\rightarrow$ C3 = 4 * 1 * [(2 * 0) + 1) = 4 * [0 + 1] = 4
1 accesso in lettura alla ridondanza #totale_sponsorizzazione che contiene già il dato da visualizzare

c(S$_{ridondanza}$) = 10 + 6.5 + 4 = 20.5

c(S)/ c(S$_{rid}$) = 36.5 / 20.5 = 1.7804878

m(S) = X (Byte)
m(S$_{ridondanza}$) = X + 4 (Byte) * 10 = X + 40 (Byte)

Conclusioni:
Confrontiamo c(S), c(S$_{rid}$), m(S), m(S$_{ridondanza}$).
Dai risultati sopra riportati si nota che solamente l'operazione 1 comporta un costo maggiore nel caso con ridondanza; invece, la 2 e la 3 comportano un costo uguale o minore.
Il rapporto fra la somma dei due costi equivale a 1.7804878, lo speed-up che ne consegue (maggiore di 1) dalla ridondanza risulta circa di 2.

Applicando la ridondanza, si può notare che nella terza operazione c'è un gap elevato tra i calcoli senza ridondanza (valore più alto) e con ridondanza (valore più basso).

Da queste considerazioni possiamo affermare che in questo caso l'utilizzo di #totale_sponsorizzazioni è conveniente e, quindi, verrà mantenuto.

L'utilizzo di #totale_sponsorizzazioni comporta un overhead di memoria pari a 40 byte. Tuttavia, il costo delle operazioni risulta ridotto, quindi è conveniente introdurlo e mantenerlo.

NORMALIZZAZIONE

La normalizzazione non è stata effettuata poiché non abbiamo individuato dipendenze funzionali e nemmeno ridondanze di dati (ne concettuali, ne logiche). Il nostro schema non presenta anomalie e, siccome la normalizzazione serve per correggerle, non abbiamo dovuto eseguirla.

DESCRIZIONE AD ALTO LIVELLO DELLE FUNZIONALITÀ CONFVIRTUAL

L'applicazione CONFVIRTUAL che abbiamo realizzato ha come scopo la gestione delle conferenze da parte degli utenti.

All'apertura del sito web, la prima schermata visualizzata è la homepage che contiene diverse statistiche: il totale delle conferenze registrate e quello delle conferenze attive, il totale degli utenti registrati, la classifica tra presente e speaker basate sulle loro valutazioni, le sponsorizzazioni e il relativo numero di sponsorizzazioni.

Dalla homepage poi è possibile effettuare l'autenticazione attraverso il bottone di login oppure effettuare la registrazione (se ci si vuole registrare per la prima volta alla piattaforma CONFVIRTUAL).

Una volta fatta l'autenticazione, il sito mostra nuovamente la homepage ma nella barra di navigazione in alto verranno visualizzate nuove sezioni: "Profilo", "Conferenze" e "Sessioni". In base alla tipologia di utente che accede alla piattaforma, queste sezioni mostrano le azioni possibili da intraprendere.

Nella sezione "**Profilo**", in linea generale, vengono rivelate tutte le informazioni riguardanti l'utente che si è loggato e verranno visualizzate una serie di operazioni che l'utente in questione può permettersi di effettuare.

Ci sono differenti azioni che l'utente può fare in base alla tipologia a cui appartiene.

Le operazioni che possono effettuare gli *amministratori* sono le seguenti: creare una nuova conferenza, creare una nuova sessione relativa ad una conferenza, inserire una presentazione ad una sessione, associare uno speaker alla presentazione di un tutorial, associare un presente alla presentazione di un articolo, inserire le valutazioni relative alle presentazioni di articoli e ai tutorial e visualizzarle, inserire uno sponsor e una sponsorizzazione.

L'operazione aggiuntiva che possono effettuare i *presenter* riguarda l'inserimento e la modifica del CV e della foto e la modifica della affiliazione universitaria.

Le operazioni che possono effettuare gli *speaker* sono le seguenti: inserire e modificare il CV e la foto, modificare l'affiliazione universitaria, inserire e modificare delle risorse aggiuntive riguardanti il proprio tutorial.

Nella sezione "**Conferenze**" vengono visualizzate le conferenze disponibili al momento attive (ma non quelle completate). Inoltre, c'è la possibilità di iscriversi ad una conferenza tramite il menù a tendina (il quale stamperà tutte le conferenze a cui l'utente ancora non si è registrato) e il bottone "registrati" per confermare l'azione di registrazione.

Nella sezione "**Sessioni**" viene visualizzato l'elenco delle sessioni disponibili e, sotto a ciascuna di esse, si può visualizzare un punto elenco con le relative presentazioni. Di fianco ad ogni sessione si trova un bottone che, se cliccato, riporta l'utente alla chat di sessione, il quale ha la possibilità di leggere i messaggi inviati dagli utenti in quella determinata chat e di scriverne altri. Inoltre, nella sezione "Sessioni" c'è un bottone (situato al fianco delle presentazioni relative ai presenter) che, se cliccato, permette di scaricare la presentazione relativa a quella presentazione.

(APPENDICE) CODICE SQL COMPLETO

ConfVirtual.sql

```sql
